Current Project

<https://app.bitxfinance.online>

- New ESDT project built exclusively on the Elrond network, provides tangible utility to holders, allowing the ability to stake, swap and receive unrivalled benefits from token through the unique products and partnerships it has established.

<https://www.letstango.com/>

- Letstango is an online shopping store that features best-priced deals on branded products like mobile phones, electronics, cameras, tablets, etc.
- At that time, in our team, there were 6 members responsible for Backend, Frontend Development. Backend Development was assigned to me and my teammate Daniel Spencer.
- The previous site looked not fashionable and there were numerous responsive issues in some parts, so we decided to use Next.js with Shopify template and improved performance by 25%.
